AQUAPAX

NON-CARBONATED
NATURAL MINERAL WATER
from Fountains of the Aquapax

a pure thirst for the environment™

www.justdrinkingwater.com
a pure thirst for the environment®

what makes **AQUAPAX**[™] mineral water so special?

innovative...

Aquapax pure mineral water stays fresh & cooler longer, protected from light & air, in leach free & bacteria free (aseptic) conditions.

user friendly...

The ultra-low nitrate level & pure low mineral content means Aquapax mineral water is safe & suitable for babies & all diets without boiling. Aquapax has a near perfect 7.1pH and tastes pure like fresh water should.

planet friendly...

Aquapax packaging is >70% paper from sustainable & renewable trees – the oil that makes plastic bottles isn't.

energy efficient...

Transporting empty Aquapax cartons uses up to 80% less fuel than empty glass or plastic bottles. When full, Aquapax uses up to 40% less fuel than transporting full glass bottles – the energy used to make glass bottles is also pretty scary.

and recyclable too...

Aquapax cartons are 100% recyclable – please try to recycle yours.
